

STOXX® GLOBAL 3D PRINTING TRADABLE INDEX

Index description

The STOXX Global 3D Printing Tradable Index is designed to give a diversified representation of companies in this emerging and booming technology. 3D printing is the process of making virtually any shape from a digital model. As an additive manufacturing technology, it has wide applications across many industries, including aerospace, health and biotech, education and manufacturing.

Key facts

» One of the first indices to represent this relatively new technology on a global scale

» Diversified with regard to geography and sector

» 40% of the index consists of companies that derive 100% of their revenue from 3D printing

Methodology

To be included in the STOXX 3D Global Printing Tradable Index, a company must pass through the following criteria - generate more than 1% of its revenue from the 3D printing sector, have a minimum three-month average daily trading volume (3-month ADTV) of 250,000 euros, a minimum free-float market cap of 80 million euros and be listed in a country classified as a developed market according to STOXX's country classification model. All companies that meet these requirements are ranked by free-float market cap. The top 30 companies will be selected for inclusion in the index. The detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/indices/rulebooks.html

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.
