1. Introduction

The Index Files Guide aims at providing an overview of the files structure for indices administered by STOXX. It may facilitate the development of automated solution to retrieve data by STOXX Customer.

The Index Files Guide should be read in conjunction with the STOXX and DAX Index Methodology and Guides available on <https://www.stoxx.com/rulebooks>

For each file, the following information will be provided:

Column ID	Column Number
Attribute	Column Name
Description	Description of data field
Data Type	Date Type: Text / Number / Date
Data Format	Data format of the field: Text (Maximum Length), Number (Decimals), Date (date format)

For questions regarding the Index Files Guide, please contact our STOXX Customer Support team:

1.1. Naming Convention

The naming convention for the description of the file name in the Index Files Guide is

xxxxx - Index Symbol

YYYYMMDD - date at which report is generated

1.2. Naming convention associated to Third-Party Data Licenses

Files may be generated in multiple versions accordingly to the Third Party Data license the client is entitled to. The following table provides an overview of the different Components File name and the Third Party Data excluded.

The File name will contain 4 characters P### to allow the identification of third party data being displayed:

- o FileName_P###_xxxxx with P### = Permissioned Third Party data,

Important Note: whenever a new 3rd-party license gets added into the system, the file names will change for clients who don't have the new 3rd-party license!

License Entitlements per Client: For demonstration, each entitlement below has got a different entitlement and hence access to a different version of the components file.

	3rd-Party (SEDOL)	3rd-Party B licence	3rd-Party C licence	3rd-Party D licence	SUM	Entitlement to File	Active

Entitlement A	Y	Y	Y	Y	0	FileName_P000_XXXXXX.csv	Yes
Entitlement B	N	Y	Y	Y	1	FileName_P001_XXXXXX.csv	Yes
Entitlement C	Y	N	Y	Y	2	FileName_P002_XXXXXX.csv	No
